

Economic Overview And Outlook: Louisiana

JOBS

- Including December, the private sector has gained jobs nationwide for 46 consecutive months.
- In Louisiana, private sector employment fell by 4.2 percent from January 2008 to February 2010. Since February 2010, private sector employment has grown by 7.7 percent.
- In Louisiana, employees in the information services, manufacturing, and professional and business services sectors faced the largest job losses (as a percent of employment within an industry) over the recession. Since the beginning of 2010, the following sectors in Louisiana have experienced the greatest employment increases: leisure and hospitality; mining; and trade, transportation and utilities.*
- As the recovery continues to take hold, service-providing industries are projected to add the most jobs between 2012 and 2022. The largest gains over this period are expected to occur in the healthcare and social assistance, professional and business services, and leisure and hospitality sectors. Job gains in the goods-producing sector of the economy will be led by the construction and mining industries.

How Does Louisiana Compare To Other States?

Workers across the country were hard hit during the recent recession. Although labor markets in many states have started recovering, employment in most states still remains below pre-recession levels. The chart below allows you to compare Louisiana to other states using two metrics.

The current unemployment rate (measured along the horizontal axis) serves as a gauge of current labor market conditions faced by residents, while the proportion of jobs lost within Louisiana since the start of the recession (shown along the vertical axis) measures the toll the recession took on the job supply in Louisiana.

States falling in the upper right quadrant have lost a disproportionate share of jobs, relative to the total United States, and have unemployment rates higher than the national unemployment rate. States falling in the lower left quadrant are experiencing lower unemployment rates and smaller job losses than the national average.
